PANKAJ THAKUR

SDE-2 Frontend Developer | MERN Stack | React.js • Next.js • Node.js

Mohali, India | +91 8708583401 | pankajthakur1713@gmail.com | linkedin.com/in/pankzthakur | pankaj-portfolio-xi.vercel.app

PROFESSIONAL SUMMARY

Full-stack MERN developer with 4+ years of experience building scalable, high-performance web applications with React.js, Next.js, JavaScript, Node.js, Express.js, and MongoDB. Delivered HLS video streaming, REST and third-party API integrations, payment gateway integrations (Stripe, PayFast), and AWS-hosted production apps, with a focus on Core Web Vitals and performance optimization.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, Vite, Redux Toolkit, Tailwind CSS, Material UI, SASS, Micro-frontends
Backend: Node.js, Express.js
Database & Cloud: MongoDB, Mongoose, Firebase, AWS, Ubuntu, PM2
APIs & Authentication: REST APIs, JWT, Role-Based Access Control, WebSockets
Streaming & AI Audio: HLS, Adaptive Bitrate Streaming, Google Text-to-Speech API, Amazon Text-to-Speech API
Payments: Stripe, PayFast, Payment Gateway API Integration, Subscription Management
Tools & Testing: Git, Bitbucket, GitLab, CI/CD, Jest, React Testing Library, Postman, Figma, Jira

PROFESSIONAL EXPERIENCE

SDE-2 Frontend Developer | **MobilePe, Noida** Mar 2026 – Present

- Lead frontend for 3 core fintech products (50,000+ active users), collaborating with backend, design, and product teams.
- Architected a 40+ component reusable library, reducing feature development time by ~35% and ensuring design consistency.
- Improved Core Web Vitals (LCP ~4s to under 1.8s, CLS to 0.05) via code splitting, lazy loading, and image optimization.
- Enforced JWT authentication and role-based access for fintech flows; passed internal security review, no critical findings.
- Introduced Jest/RTL testing standards for the component library: coverage from 0% to 65%, catching 12+ bugs pre-production.

SDE-2 Frontend Developer | **Dev Story, Chandigarh** Jan 2025 – Feb 2026

- Built The Short Film Showcase OTT platform from scratch: custom HLS player with adaptive bitrate for 10,000+ monthly viewers.
- Built 5-role access control and dashboards with Redux Toolkit and JWT middleware for secure multi-tenant content management.
- Built a booking system (500+ daily transactions) with payment gateway APIs and real-time WebSocket status updates.
- Cut initial page load time by 48% via micro-frontend refactoring, route-based code splitting, and SSG for content-heavy pages.
- Delivered sprints at a 94% on-time rate in a cross-functional Agile/Scrum team of 8 (design, backend, QA).

SDE-1 Frontend Developer | **C-J Technologies, Mohali** Jul 2022 – Jan 2025

- Developed and maintained 6 production React apps, raising average Lighthouse score from 58 to 84 via refactoring and API caching.
- Integrated 15+ REST APIs with error handling, retry logic, and loading states, cutting frontend data errors ~40% in the first quarter.
- Built a WebSocket real-time notification system, reducing customer support tickets about delayed updates by 30%.
- Proposed a normalized MongoDB schema in system design discussions, reducing reporting dashboard query time by 35%.
- Established a Jest + RTL suite across 6 production apps (70%+ critical-flow coverage), reducing regression bugs by ~30%.
- Mentored 2 junior developers via code reviews and pair programming, reducing PR revision cycles by 25%.

PROJECTS

The Short Film Showcase – OTT Streaming Platform | *Next.js, Node.js, HLS, JWT, Redux Toolkit, AWS* theshortfilmshowcase.com

- Custom HLS video player with adaptive bitrate streaming, JWT authentication, 5-tier RBAC, and subscription management; 10,000+ monthly viewers, 99.5% uptime on AWS.

SML Vahan Suraksha – Vehicle Tracking & Security Application | *React.js, JavaScript, Geolocation, Role-Based Access*

- Built React.js and JavaScript frontend features for an application that monitors vehicles in transit from factory to destination.
- Implemented role-based access interfaces supporting multiple user roles and their respective permissions.
- Integrated geolocation for live, real-time vehicle tracking, with alerts to help identify suspicious activity.

Text-to-Speech AI Application | *Next.js, JavaScript, Tailwind CSS, Firebase, Google & Amazon Text-to-Speech APIs*

- AI text-to-speech app converting text to audio via Google and Amazon speech APIs, with multilingual support, character voice selection, and audio download; Firebase stores user data.

FundsApp – Offline Trading Platform | *React.js, Vite, Node.js, PayFast*

- Offline trading platform with a React.js + Vite frontend and Node.js backend, integrated with the PayFast payment gateway.

Quick Menuz – QR-Based Restaurant Menu Platform | *Next.js, Tailwind CSS, Node.js, Stripe*

- QR code opens the restaurant's digital menu website; admin dashboard to create and manage menus; Stripe payment integration.

Oral Envision (dev.oralenvision.com): Dental practice management frontend; cut bundle size from 2.1MB to 890KB (58%) via tree-shaking and dynamic imports; Lighthouse score of 91.

SkillSouq LMS (dev.skillsouq.ai): Real-time LMS with WebSocket-powered live classrooms, role-based instructor/student dashboards, and a React video quiz engine.

EDUCATION

B.Tech, Mechanical Engineering | CGC Jhanjeri, Mohali
Transitioned into software engineering through self-directed, project-based learning (React, Node.js, system design).
